

Billing

- My weekly maintenance service is billed on the 1st of each month
- Credit cards are accepted with a Discover, Visa or Master card logo for your convenience

What to expect from weekly visits

- Water chemistry will be tested and adjustments will be made as necessary
- Skimmer basket and pump basket will be checked and emptied as necessary
- Debris will be netted from the pool
- Pool walls, steps and love seat will be brushed as necessary
- Equipment will be inspected for proper operation
- Filter pressure will be checked
- Sand and DE filters will be back washed as necessary

Chemicals that are included and those which are not

- All chemicals required for routine weekly maintenance of your pool are included
- Included chemicals are **shock, chlorine tabs, muriatic acid, soda ash and DE powder for DE filters**
- Special interventions require specialty chemicals - **used mostly during the monsoon season**

Cyanuric acid [stabilizer]	\$3.00 per Lb
Phosphate removal	\$20.00 flat rate
Black algae treatment	\$8.00 per 10,000 gallons - dosage based upon pool size
Mustard algae treatment	\$3.00 per 10,000 gallons - dosage based upon pool size
Clarifier treatment [for sand filters]	\$3.00 per 10,000 gallons
Aluminum Sulphate treatment [for sand filters]	\$2.50 per 8 oz

What to expect if there is an approaching lightning storm, wind storm or rain storm

- Skimmer basket and pump basket will be emptied
- Water chemistry will be tested and adjusted as necessary
- **Vacuuming, netting and brushing may be performed the following week**

Cartridge filters cannot be backwashed like DE filters and sand filters. When the pressure goes up 10 pounds from its starting pressure [the filter pressure after a cleaning] the cartridges must be removed, hosed down and inspected. If I provide that service for you, I charge 1 hour of labor.

Repair work through out the year often forces me to rearrange my schedule. All weekly visits are completed with in 24 hours of the scheduled day between 7am and 7pm.

Thank You
